

Skipper guidance for Crew registration on Yacht Scoring.

When the skipper registers, they need to also **list the crew** they anticipate. Then,

1. Have the crew member go to the Yachscoring.com website for the event or go to www.dunedinboatclub.org and click on the “racing” tab.
2. Then click on “racing schedule” drop down page and
3. Then click on the event name such as “Fall Regatta” and the link to Yacht Scoring.

This will take the Crew directly to where they need to be. **In order for them to be able to fill anything out, you, the skipper, had to have already listed them as a crew member on your boat.**

To keep from trying to remember who registered and who didn't from your crew, it is suggested the Skipper register each and every crew member that will sail with you throughout the year for DBC races. Their info will then be kept on file just like yours is.

Assuming you have listed your crew member, they then go to the CREW'S CORNER link to register. The first time they go in, they will be directed to put their email in. They will then be sent an initial password via email in order to get in. Once in, they can change the password to whatever they want. Once in Crews Corner, they fill in all the information. The waiver will be included in that area and it simply requires a check with the mouse. They need to **save their entry**. The crew is the only one who can enter in the Crews Corner.

Subsequent events. For any future racing events, after the skipper has entered the regatta via their registration and once again listed crew, the crew simply needs to go into that event's “Crews Corner” for that event and sign the waiver."
